

Professional 118 Leak Detector Compressed Air

Testing foam for the detection of leaking sections, micro-leakages and hair cracks. Suitable for all pressurized pipe sections (compressed air, burnable gases), pressurized containers, compression facilities, compressed air braking systems and welding devices, as well as leaking sections of tires and hoses. Frost-proof up to -16°C. DVGW-certified.

Properties

- ✓ Biodegradable
- ✓ Frost-proof down to -16°C
- ✓ DIN 30657 compliance approved by the German Association for Gas and Water
- ✓ Prevents corrosion
- ✓ Can be washed away without leaving residue

Application area

- ✓ Pipes (compressed air, combustion gases)
- ✓ Pressure vessels
- ✓ Compressors
- ✓ Compressed-air brake systems
- ✓ Welding devices
- ✓ Air-conditioning units
- ✓ Natural gas and LPG systems

Instructions

Spray pressurised components from approx. 40 cm away. The leak is shown by foam bubbles. Then rinse with water. Use the spray head with precision tube in difficult-to-reach places.
