

TUNJET S

2015 Filling Station for 115

Eco-friendly filling system for 115 Universal Cleaner with 100% safeguarding against electrostatic charge and toxic fumes.

Newly developed filling system for more robust design, higher reliability and improved safety.

- ✓ Newly developed filling system for more robust design, higher reliability and improved safety.

Properties

- ✓ Filling of product and compressed air in one operation
- ✓ Special construction 100% safeguarded against static charge
- ✓ Light plastic housing
- ✓ Integrated manometer for visual functional check
- ✓ Large fill capacity (400 ml)
- ✓ Replaceable filling coupling
- ✓ Chemically stable for approved liquids

Application area

- ✓ For eco-friendly and cost-effective filling of refillable spray cans

Instructions

Place TUNJET can on filling plate and press down. Can fills with product and compressed air in approx. 5–8 seconds. If the compressed air is ever insufficient for completely emptying the can, only compressed air can be refilled on the right filling connection.

Notice

- ✓ Air inlet maximum 10 bar
- ✓ Can filled with 8 bar (cleaner)
