

## TUNAP

### 13400 Valve Clean System

Special cleaning tool for valves and their surrounding ducts. Fast, material-conserving cleaning thanks to the special valve cleaning granulate MF933. With the neutralisation solution MF936, residual particles of the granulate are broken down and do not reach the combustion chamber.

#### Properties

- ✓ Effective cleaning thanks to the granulate, which matches the contamination
- ✓ Special grain size — ensures consistent product quality
- ✓ Special geometry — no wear or damage to the surface structure
- ✓ Simple and reliable application — residual particles of the granulate can be broken down with 936 neutralisation solution
- ✓ No hazardous materials
- ✓ No hazard labelling (hazard symbols, hazard text)

#### Application area

- ✓ Valve cleaning

#### Instructions

Refer to SI 933 before use.
