

## TUNAP

### 13400 Valve Clean System

Special cleaning tool for valves and their surrounding ducts. Fast, effective and material-conserving cleaning thanks to the special valve cleaning granulate MF933. With the neutralisation solution MF936, residual particles of the granulate can be broken down and do not reach the combustion chamber.

#### Properties

- ✓ Effective cleaning thanks to the granulate, which matches the contamination
- ✓ Specific grain size – ensures consistent product quality
- ✓ Specific geometry – no sharp-edged or compressing properties, therefore no abrasion, wear or damage to the respective surface structure
- ✓ Simple and reliable application – with 936 neutralisation solution, residual particles of the granulate can be broken down
- ✓ Not a hazardous good
- ✓ No hazard labelling (hazard symbols, hazard texts)

#### Application area

- ✓ Valve cleaning

#### Instructions

Refer to SI 933 before use.

Product Description	Contents	Packaging Unit	Article Number
Valve Clean System	0	1 PCS	1613400V1
