5130 Rim Cleaner neutral

For gentle removal of stubborn contamination such as brake dust and other road contamination from all steel and aluminium rims. Thanks to the pH-neutral design the cleaner is suitable for all materials used on rims.

Properties

- ✓ pH-neutral design
- ✓ No corrosion on wheel bolts and steel parts
- ✓ Compatible with all materials used on rims

Application area

- ✓ Aluminium rims
- ✓ Steel rims
- ✓ Plastic wheel caps

Instructions

Spray rims evenly from a short distance away. Allow to soak in for 1–5 minutes depending on the degree of contamination. Product turns red in the process. If necessary, remove stubborn contamination with a sponge or brush. Then rinse thoroughly with clear water or a high-pressure cleaner.

Notice

- ✓ Do not use in direct sunlight or on hot rims
- ✓ Do not leave to dry
- ✓ Store in a frost-free place
