**974 Injector Direct Protection**

When used regularly, protects injectors with ROA² technology against fuel-related deposits. This minimises consumption and exhaust emissions values. When added to the fuel tank, the fuel is proven to remain within the DIN EN 228 fuel standard. Suitable for all petrol–(ethanol) mixtures (EURO 6).

### ROA² (Reactive Organic Amines) technology
- ✔ Further development of ROA technology (more powerful cleaning formula)
- ✔ Deposits on injectors are broken down and cleaned away
- ✔ Re-contamination is prevented
- ✔ Excellent dissolution properties in all petrol mixtures

### Properties
- ✔ Protects against fuel-related deposits
- ✔ The active ingredient is activated and works directly on the injector
- ✔ Returns fuel consumption and emission values in the presence of fuel-related soiling to the levels expected of new vehicles
- ✔ Increases the octane number to prevent „knocking“ and protect against engine damage
- ✔ Suitable for use by the end customer

### Application area
- ✔ For all intake-manifold and direct-injection petrol engines
- ✔ For safeguarding overall fuel quality
- ✔ For regular protection in accordance with the use of 979 Injector Direct Cleaner or 937 Injector Intensive Cleaner

### Instructions
Add to the fuel tank. Use the filler neck to do so. Sufficient for up to 80 litres of fuel (min. 10 litres of fuel).

### Dosing
Sufficient for up to 80 litres of fuel.
