

micrologic[®] 127 injector cleaner

Fully synthetic cleaning agent with excellent cleaning properties for all types of diesel injectors. Highly effective cleaning of nozzle hole carbonation and lacquering in the needle area of the injector.

Properties

- ✓ Direct cleaning of injection nozzles
- ✓ Cleaning of injection nozzles or injectors on common rail, pump/nozzle or other diesel fuel injection systems
- ✓ No need to dismantle the injectors
- ✓ Detachment and removal of resin and carbon deposits in injectors
- ✓ Dissolves and eliminates fuel-related contamination in high-pressure pumps
- ✓ Eliminates carbon deposits in the nozzle hole area
- ✓ Cleans the entire combustion chamber

Application area

- ✓ For problems with contaminated injectors (varnish and resin deposits)
- ✓ Prior to all adjustment work and emissions tests (soot particulates)
- ✓ For all repairs on the diesel injection system
- ✓ For diminished engine performance
- ✓ For increased soot build-up

Instructions

For use with the 1353 Canister Adapter. Observe Service Information SI 127, SI 127-5 or SI 127IC.
