

Professional 138 Intake System Cleaner

Highly effective active solvent especially for cleaning typical contamination and deposits around the air intake and throttle valves.

Properties

- ✓ Breaks down resins, oily residues and carbon soiling in the intake area of petrol engines
- ✓ A special spraying system delivers high mechanical cleaning performance

Application area

- ✓ Cleaning of throttle and throttle units
- ✓ For making moving parts, including idling actuators accessible
- ✓ Cleaning of carburettors (internally and externally)
- ✓ Rinsing of bore holes and nozzles

Instructions

Liberal spray the whole surface of the parts to be cleaned and allow the agent a few minutes to soak in. Rinse off any dislodged dirt by spraying again with product 138. Residual agent remains on the surface as a protective layer.

Notice

- ✓ Only use for petrol engines!
- ✓ For better cleaning results it is recommended to dismantle throttle units and similar components in order to be able to clean difficult to access places optimally.
