

## Professional 144 Cooling System Agent

Non-hazardous, synthetic cooling system active substance. Suitable for use in cooling lubricants with or without silicate. Converts rust and lime into water-soluble substances and supplements consumed additives in the coolant. Integrated UV pigment particles allow quick determination of leaking areas in the cooling system.

### Properties

- ✔ Ensures the cooling system functions correctly
- ✔ Supplements consumed coolant additives
- ✔ Cleans the entire system continuously while driving
- ✔ Converts corrosion and lime into water-soluble substances
- ✔ Prevents foam build-up that reduces cooling
- ✔ Leaking areas can be determined quickly and easily under UV light
- ✔ Compatible with all anti-freezes

### Application area

- ✔ From 10,000 km or every 20,000 km
- ✔ Do not use more than once a year
- ✔ When replacing and adding cooling lubricant
- ✔ After replacing components in the cooling system

### Instructions

Add the coolant. Sufficient for 10 litres of coolant.

### Dosing

Sufficient for 10 litres of cooling lubricant.

### Notice

- ✔ Observe the coolant level when adding
