151 Cabriolet Hood Care Set

Deep cleaning and waterproofing for optimal long-term protection of the cabriolet hood against water and dirt. Keeps the colour depth for all hood colours. The fabric looks like new again. The hood material remains permanently breathable.

Properties

- ✓ Optimal long-term protection against water and dirt
- ✓ Seams are sealed against water penetration
- ✓ Wet hoods drip off quickly
- ✓ Keeps the colour depth and the fabric like new for longer
- ✓ The hood fabric remains breathable
- ✓ Effective long-term for all hood colours
- ✓ Effective deep cleaning

Application area

- ✓ Natural fabric
- ✓ Mixed fabric
- ✓ Plastic-laminated hoods
- ✓ Pre-waterproofed hoods

Instructions

Clean the wet hood in a taut condition with the cleaner. Rinse well with water and leave to dry. Apply the waterproofing liberally and evenly. Repeat the cleaning and waterproofing every year.

Notice

- ✓ The cleaning and applying of the waterproofing should not take place under direct sunlight. Otherwise irregular drying can occur.
- ✓ The waterproofing effect can be accelerated after the work has been finished by applying heat, e.g. sunlight or warm air.
