

CARGO logic[®]

641 Intercooler Cleaner

Improves the cooling performance of the charge air cooler. Clears the radiator of dirt from construction site and insect contamination, without needing a complex removal. Protects against salt water and aluminium corrosion after cleaning.

Properties

- ✓ Optimal material compatibility thanks to the improved recipe (manufacturer release by BEHR)
- ✓ Prevents engine damage due to lack of cooling (due to the radiator being dirty)
- ✓ Saves time and money because the radiator does not need to be removed
- ✓ Gently and reliably removes insects and dirt from construction sites
- ✓ Provides protection against salt water
- ✓ With aluminium corrosion protection

Application area

- ✓ For external charge air cooler cleaning (without radiator removal)
- ✓ For the cleaning of aluminium roller doors, aluminium tanks and aluminium rims

Instructions

Spray cleaner with TUNAP 1800 high-pressure cleaner and suitable combination probe onto the radiator. Allow to soak in for 5 minutes and rinse with water. Observe Service Information SI 641.

Dosing

Concentration 1:50.
