644 Thermal Radiator Protection

Powerful concentrate for supplementing consumed additives in commercial vehicle cooling systems. Converts corrosion and lime into water-soluble substances. Stabilises the pH-value. Contains fluorescent active substances for determining leaks.

Properties

- ✓ Safeguarding of the cooling system
- ✓ Cleans whilst driving
- ✓ Converts corrosion and lime into water-soluble substances
- ✓ Protects the system from further corrosion and lime deposits.
- ✓ Neutralises acidic coolant
- ✓ Disperses slime and pollutants
- ✓ Stops cooling-reducing foam formation

Application area

- ✓ When replacing and adding coolant
- ✓ When replacing radiators, thermostats, cylinder head gaskets, water pump and similar assemblies

Instructions

Add to the coolant for long-term protection. Observe the coolant level in doing so. Compatible with all anti-freezes. Also recommended for closed cooling systems.

Dosing

Sufficient for up to 40 litres of coolant.

Notice

- ✓ Do not use more often than once a year
