

Professional 126 DPF Maintenance Spray

Non-flammable, metal-free cleaner for removing carbon and ash deposits in diesel particulate filters. For restoring the full retention capacity of the diesel particulate filter during the service.

Properties

- ✓ Application is possible without dismantling the particulate filter
- ✓ Reduces the load state of the diesel particulate filter
- ✓ Removes carbon and ash deposits
- ✓ Non-flammable
- ✓ Ash and metal-free formulation
- ✓ Evaporation without residue

Application area

- ✓ For restoring the full retention capacity of the diesel particulate filter during service
- ✓ For the first signs of particulate filter problems such as loss of performance and increased fuel consumption
- ✓ For prevention in case of an unfavourable driving profile

Instructions

Dismantle the temperature or pressure sensor on the diesel particulate filter. Spray the cleaner into the opening created, at intervals, in the direction of the particulate filter. Then, reattach the sensors and carry out a test drive. Delete existing error codes. For professional use by workshops and qualified technicians only.

Notice

- ✓ Clean with cleaning kit MP 131 for already blocked particulate filters. Refer to Service Information SI 131.
