

Professional 155 Motor System

Active agent concentrate refill with OMC2 formula for safeguarding the full efficacy of the engine oil over the entire inspection interval. Suitable for all mineral and synthetic engine oils. Brings partially used engine oil active agents back to full fresh-oil performance. Lower oil shortages are compensated by this.

Active agent refill concentrate with OMC2 formula for safeguarding the full efficacy of the engine oil over the entire inspection interval. For all mineral-based and synthetic engine oils

- ✓ Active agent refill concentrate with OMC2 formula for safeguarding the full efficacy of the engine oil over the entire inspection interval. For all mineral-based and synthetic engine oils

Properties

- ✓ Reduces the friction resistance due to the OMC2 formula
- ✓ Cleans the whole oil circuit up to the critical piston ring zone
- ✓ Unblocks resinified piston rings
- ✓ Protects against corrosion
- ✓ Neutralises aggressive combustion acids
- ✓ Reduces wear caused by friction
- ✓ Improves intake
- ✓

Application area

- ✓ Preventive, as refill concentrate
- ✓ Complies with the highest API and CCMC synthetic oil standards

Instructions

Top up the used engine oil (max. 10% of the engine oil filling quantity).

Dosing

Sufficient for 4.5 litres of engine oil.

Notice

- ✓ The preventive oil additive achieves full efficacy with all mineral-based and synthetic engine oils, in all viscosity grades, and with all national and international specifications
