

TUNAP Sports **TS300 Waterproofing spray**

Waterproofing should be reapplied to functional clothing at regular intervals. The spray is suitable for all types of fibre, as well as leather and hard surfaces. It contains no hazardous fluorine compounds, dries quickly and does not form a film.

TUNAP SPORTS quality promise:

- ✓ PFC/fluorine free.
- ✓ Tested for inhalation toxicity.
- ✓ Suitable for all types of fibre and leather.
- ✓ No allergenic fragrances.
- ✓ No neurotoxic solvents.
- ✓ No risk to health.

Properties

- ✓ Waterproofing spray that does not contain harmful and hazardous fluorine compounds.
- ✓ It re-proofs all types of fibre and leather.
- ✓ Just spray on and leave to dry.
- ✓ No heat treatment required.
- ✓ The waterproofing spray does not form a film.
- ✓ A special formula prevents the waterproofing spray from entering the lungs, helping to protect the user's health.

Application area

- ✓ TUNAP SPORTS waterproofing spray is designed for re-proofing material (shoes, jackets, bags, etc.) and providing long-term protection.
- ✓ Treat the relevant material once a year with the spray.
- ✓ If the product is used frequently, treat the material on a more regular basis.

Instructions

The product (jacket, shoes, bag, etc.) must be clean and dry. Only use the waterproofing spray outside or in well-ventilated rooms. Spray from a short distance and ensure the surface is evenly covered. Leave the treated products to dry at room temperature for at least 30 minutes. If the product is used frequently, repeat the re-proofing process regularly.
