

TUNAP Sports **TS240 Bearing grease**

TUNAP SPORTS Bearing Grease protects all moving bicycle parts against moisture and corrosion. The dirt-repellent properties and high temperature resistance ensure optimal performance of all parts that are subject to high loads, such as gear hubs, headsets and bottom brackets.

TUNAP SPORTS quality promise:

- ✓ The bearing grease is able to absorb a huge amount of moisture (ideal for standing water and moisture from evaporation) and seals the contact point against water and abrasive substances.
- ✓ Effective corrosion protection and improved corrosion resistance.
- ✓ Maintains its consistency under mechanical stress, making it ideally suited to extreme loads - the grease stays dynamic and very smooth running.

Properties

- ✓ Fully synthetic high-performance grease with integrated dispenser for easy dosing.
- ✓ The dispenser protects against contamination.
- ✓ For optimal performance of the mechanics (hubs, headset, bottom brackets etc.).
- ✓ Grease does not „bleed out“, even in direct sunlight.
- ✓ Ensures sufficient mechanical stability.
- ✓ Provides sufficient contact with the lubricant.
- ✓ NLGI Class 2/per DIN 51818.
- ✓

Application area

- ✓ For lubricating various bearings and moving parts on bicycles, after every repair or service and after cleaning the bicycle.

Instructions

1. Thoroughly clean the parts to be lubricated using TUNAP SPORTS Drive Cleaner or Brake Cleaner.
2. Dispense the desired amount of TUNAP SPORTS Bearing Grease and apply where required.
3. Remove excess bearing grease with a cloth.

Product Description	Weight of content	Article Number	Packaging Unit
Bearing grease	0.1 kg	1103007	12 PCS
Additional accessory		Article Number	Packaging Unit
Ultra-Fine Fibre Cloth		1401016	400 PCS
