Product Information

airco well®

994L airco well® Starter Set L

The airco well® set contains cleaning chemicals and a reusable tool for state-of-the-art cleaning. The cleaning pressure penetrates the evaporator of the air-conditioning unit. The area around the interior air filter is cleaned without leaving any residue. Our instructions enable you to easily meet the VDI/ZDK requirements for all car models.

Properties

- ✔ Cleaning of the complete vehicle air-conditioning unit in accordance with VDI/ZDK 6032
- ✔ Improves air quality in the car
- ✔ For rapidly cleaning dirt and deposits on the evaporator
- ✔ Removes the biofilm formed by micro-organisms (fungi, bacteria)
- ✔ For eliminating unpleasant odours that can arise as a result of germs, fungi and bacteria
- ✔ Contains no allergenic dyes or fragrances (ECARF certified)
- ✔ TÜV Thüringen certified - proven to increase air flow through the evaporator

Benefits

- ✔ Effective and sustainable solution against bad-smelling and contaminated vehicle air-conditioning units - to keep cars smelling fresh.
- ✔ VDI/ZDK compliant: The only method available on the market that meets the stringent requirements of VDI/ZDK Guideline 6032.
- ✔ ECARF certified: Ideal for people with allergies, as it is free from biocides, fragrances and dyes.
- ✔ TÜV Thüringen certified: The chemical-mechanical cleaning of the evaporator increases the air flow and therefore improves the efficiency of the air-conditioning unit.
- ✔ Immediate odour elimination: Long-lasting air freshness in the case of acutely musty, mouldy or bad-smelling air-conditioning units.
- ✔ Prevention of bad odours: Also recommended for use as a preventive measure each time the pollen filter is changed to prevent unpleasant odours from developing in the first place.
- ✔ Hygienic cleaning: Effectively removes micro-organisms and mould on the evaporator and in the pollen filter housing.

Application area

- ✔ With airco well®, you can clean both the evaporator and the pollen filter housing of a vehicle air-conditioning unit according to the latest technological standards. This is recommended each time the pollen filter is changed, at least every 12 months, in accordance with VDI/ZDK Guideline 6032.

Instructions

Cleaning the evaporator:
Place a collection tray under the condensate drain. Use footwell protection on the passenger side. Remove the interior filter and get rid of any coarse dirt (e.g. leaves) in the ventilation system. Guide the probe through the air trunking to the evaporator, carefully bending the probe if necessary (max. 45°). Fill the pressure cup gun with the entire contents of the airco well® 994 and connect to the compressed air. Place your thumb on the guide disc and perform the spray test. Ensure that the spray direction is correct and check whether the liquid flows into the tray. Rinse the entire evaporator by moving the probe back and forth.
Cleaning the pollen filter box:
Pull the cleaning cloth over the airco well® cleaning tool. Pull the holes over the hooks. Shake airco well® 998 for 15-20 seconds before use. Hold the tool and the cloth vertically,
