

## TUNAP

# 299 Leaf Spring Protection

Extremely pressure-resistant, optimally adhesive special lubricant with a very high level of corrosion resistance. Prevents leaf-spring noises and seals against rust formation.

### Properties

- ✓ Prevents leaf-spring noises
- ✓ Reliable long-term lubrication
- ✓ Seals against rust formation

### Application area

- ✓ Protection and care of leaf-spring systems
- ✓ Also suitable for adhesive lubrication for toothed racks, chains, ring mounts, gear wheels, etc. and for care in the underbody area

### Instructions

Clean parts. Release leaf springs, spray into the gaps and allow to dry.
