

Professional 381 Leak Detector Car Body

Innovative leak detector fluid for all areas of the bodywork. Leaking points are detected more easily thanks to special UV pigment particles.

Properties

- ✓ Quick and precise localisation of water ingress by means of UV pigment particles
- ✓ Avoids complaints when performing bodywork tasks

Application area

- ✓ In case of water penetration in the bodywork
- ✓ For safeguarding accident repairs
- ✓ After installing washers, rubber seals, glass roofs, rear lights etc.

Instructions

Mix leak detector with water (mixing ratio of 1:1) and spray onto the relevant area using the appropriate tool (e.g. pump sprayer). Then search for the leak by shining a UV lamp inside the bodywork.

Notice

- ✓ Do not use in direct sunlight or on hot paint.
