

Professional 1700 Leak indicator set

Everything in one case: In addition to leak detector products 118, 381, 154, 582 and 144, the fillable „easy to handle“ leak detection kit also has space for the corresponding tools.

Properties

- ✓ 5-in-1: five leak detector products in one case
- ✓ „Find the leak“ map for demonstrating the UV component included
- ✓ QR code with application videos
- ✓ Easy transport with carrying handle

Application area

- ✓ The 144 Cooling system active ingredient is used for the identification of leaks in the cooling system.
- ✓ The 118 Leak indicator compressed air is used to identify leaks on pressurised parts.
- ✓ The 381 Bodywork leak indicator is used to identify leaks in the exterior of the bodywork.
- ✓ The 582 A/C system agent is used to identify leaks in the air conditioning system area.
- ✓ The 154 Leak indicator oil/fuel is used to identify leaks in the oil and fuel area.
