- ✓ Specially developed combination of synthetic base oils, CaSuX thickener and additives to protect against wear, oxidation and corrosion
- ✓ NSF H1 registered
- ✓ ISO 21469, Kosher and Halal certified

Application area

- ✓ For general use in low-temperature and high-speed applications (e.g. in roller and slide bearings, ball and threaded spindles or precision gears with tooth flank lubrication), especially in metalworking/mechanical engineering, drive technology and electric motors. Precision and measuring systems.
- ✓ In accordance with strict standards on the use of lubricants in the food, drink and pharmaceutical industries, e.g. in filling stations, autoclaves, diverter wheels, fans, kilns and linear guides and drives

Instructions

In accordance with technological standards for lubricating greases.

We recommend cleaning the surfaces to be lubricated beforehand with a suitable cleaner (TUNCLEAN 895, FDB or EL) and leaving to dry. If the product is to be used in the food processing industry: Only the minimum quantity technically necessary may be used.

If the product is used as a corrosion-protection film for the food processing industry, it must be completely removed before the device in question is used again.
