

microflex® 926 Carbon Remover

microflex® 926 EGR valve cleaner uses unique XGel technology to remove carbon soiling extremely quickly. Its excellent surface adhesion and wetting properties enable short working times and effective dirt removal. Ideal for cleaning components in the intake and exhaust gas system.

Properties

- ✓ Solvent-free
- ✓ Non-combustible
- ✓ Specially developed XGel technology for effective cleaning

Benefits

- ✓ Excellent cleaning results on carbon residues
- ✓ XGel technology
- ✓ Optimal surface wetting
- ✓ Optimal working time
- ✓ Excellent flow behaviour

Application area

- ✓ Ideal for cleaning smaller components in the intake and exhaust gas system such as EGR valves

Instructions

Refer to Service Information SI 926 before use.

Remove larger deposits beforehand using a suitable tool. Completely coat the surfaces to be cleaned with the cleaning gel. Leave the gel to work for at least 10 minutes. Then manually remove the loosened dirt with the integrated brush. Finally, rinse the cleaned area or component with plenty of water and dry with compressed air. Repeat the process if necessary.
