

## Professional 130 Special Solvent

For loosening vehicle components that have seized due to corrosion, e.g. injectors or rims on the wheel hub, using an innovative sequestrant reaction. With skin-neutral pH value.

### Properties

- ✓ Breaks down thick layers of rust on surfaces using an innovative sequestrant reaction
- ✓ Effective deep-working action into the material thanks to highly degradable special tensides
- ✓ Contains glycerine as a lubricating ingredient that is not harmful to humans
- ✓ Skin-neutral pH value
- ✓ Not corrosive

### Application area

- ✓ Dismantling jammed (rusted) injection valves or injectors
- ✓ Rims jammed on the wheel hub
- ✓ Jammed screw connections

### Instructions

Clean grease and oil from parts. Spray generously and direct onto the parts to be loosened. Then leave to work for about 30 minutes and rinse off the dissolved dirt by spraying again.
