

TUNAP Sports **TS290 Puncture spray**

The puncture spray seals small holes in a matter of seconds thanks to a specially developed latex dispersion and also pumps up the tyre. It is ideal for all rides with the bike of your choice. The puncture spray is compatible with all tyre types (tubed/tubeless). The related adapter fits car, French and Dunlop valves.

Seals holes in a matter of seconds

- ✓ Pumps up the tyre immediately
- ✓ No tools required

Properties

- ✓ Seals holes in a matter of seconds
- ✓ Pumps up the tyre immediately
- ✓ No tools required

Application area

- ✓ For quickly repairing tyre damage on the go. Pumps and repair kits no longer need to be taken on rides. The puncture spray repairs a small hole in the tube in seconds and pumps up the tyre at the same time.
- ✓ The tyre is pumped up to 2-5 bar depending on size and volume.
- ✓ Please note: Not suitable for continuous use. It is recommended to change or repair the tube/tyre at home after use.

Instructions

1. If required, let out air and position the valve at the top (remove the cause of puncture/foreign body first, if necessary).
2. Shake the spray can well. Use the appropriate adapter for the puncture spray and screw straight onto the valve (unscrew French valve first).
3. Spray the full contents into the tyre/tube (keep the can upright).
4. Quickly unscrew the adapter (retighten the French valve).
5. Turn the wheel several times to distribute the liquid.
6. Adjust the air pressure, if required.

Notice

- ✓ Carefully screw on the adapter straight. Do not overtighten!
- ✓ It is recommended to change or repair the tube/tyre at home after use.
