

micrologic® 188 System Protection

Innovative agent combination to preserve fuel and protect it against deterioration and oxidation. Suitable for all diesel engines with and without a particulate filter. Improves starting behaviour after a prolonged idle period.

Properties

- ✓ Slows down the oxidation-related deterioration of the fuel
- ✓ Cleans the fuel system
- ✓ Binds water and prevents corrosion
- ✓ Increases the cetane number
- ✓ Improves starting behaviour after prolonged idle periods
- ✓ Suitable for all diesel/bio-diesel mixtures, e.g. B7

Application area

- ✓ For preventative use for all diesel engines
- ✓ For constant use in engines that are rarely used
- ✓ For the preservation of fuel and protection against deterioration and oxidation
- ✓ For bringing even vintage cars back into use smoothly

Instructions

Empty the contents of the can into the fuel tank.

Dosing

Recommended dosage of one can (150 ml) for 50 litres of fuel. Recommended dosage of one can (950 ml) for 1,000 litres of fuel.
