3915 Aluminium can for 915

Refillable aluminium can for 915 cleaner. For use with the TUNJET S filling station. Perfect for maintenance, repair and assembly work in the skilled trade sector.

Properties

- ✓ Refillable
- ✓ Bottle volumes: 650 ml
- ✓ Fill capacity: 400 ml
- ✓ Large air pressure reserve
- ✓ Compressed air can be refilled separately
- ✓ The special protective cap protects the valve and spray head against damage

Application area

- ✓ Filling with MP 915 cleaner

Instructions

Depressurise the can before filling. To do so, use a suitable tool (e.g. screwdriver) to press the plastic inset on the filling valve inward. Important: Rotate the can and keep the valve away from the body, because residual fluid might escape.
