

## TUNAP

### 1808 Flexible Probe Extension

Flexible hose piece for inserting the TUNAP combination probes optimally between the different coolers. Additional slip-proof handle for reliable operation even with 90° applications

#### Properties

- ✓ Flexible probe extension
- ✓ For cleaning difficult to reach charge-air coolers

#### Application area

- ✓ For the charge-air cooler cleaning as an accessory for the TUNAP high-pressure cleaner and the compatible TUNAP combination probes.
- ✓

#### Instructions

Attach to the high-pressure cleaner's spray lance and then attach the combination probe to be used.

#### Notice

- ✓ During use, recoil may occur due to the 90° spray angle. Always wear protective gloves and safety glasses.
- ✓ Not suitable for use with steam jets.
