

## TUNAP

### 18301 A/C Adapter R134a

Connection adapter to fill the 582 A/C system agent with refrigerant R134a in the refrigerant circuit via the low-pressure connection of air-conditioning systems. Clear designation of the connection to refrigerant R134a thanks to the engraving on the adapter head.

#### Properties

- ✓ Black adapter head with engraving denoting refrigerant R134a
- ✓ Robust, transparent connection hose
- ✓ Easy to assemble on the low-pressure valve of air-conditioning systems using refrigerant R134a

#### Application area

- ✓ Add the 582 A/C system agent to the refrigerant circuit

#### Instructions

Screw in the filling hose at the filling adapter and carefully push the can of the 582 A/C system agent into the adapter until it snaps into place. After the air-conditioning unit has been in operation for at least one minute, push the black adapter head (quick-action coupling) onto the low-pressure service connector until it clearly clicks into place. Please note SI 582!
