18302 A/C Adapter R1234yf

Connection adapter to fill the 582 A/C system agent with refrigerant R1234yf in the refrigerant circuit via the low-pressure connection of air-conditioning systems. Clear designation of the connection to refrigerant R1234yf thanks to the engraving on the adapter head.

Properties

- ✓ Green connection adapter head with engraving denoting refrigerant R1234yf
- ✓ Robust, transparent connection hose
- ✓ Easy to assemble on the low-pressure valve of air-conditioning systems using refrigerant R1234yf

Application area

- ✓ Add the 582 A/C system agent to the refrigerant circuit

Instructions

Screw in the filling hose at the filling adapter and carefully push the can of the 582 A/C system agent into the adapter until it snaps into place. After the air-conditioning unit has been in operation for at least one minute, push the green connection adapter head (quick-action coupling) onto the low-pressure service connector until it clearly clicks into place. Please note SI 582!
