

TUNAP Sports TS760 TUNJET S refill system

The TUNJET S refill system is a practical filling system especially for bicycle workshops. The system is easy to use and cans can be refilled quickly. Packaging waste can also be reduced significantly.

TUNAP SPORTS quality promise:

- ✓ Newly developed refill system in familiar aerosol quality.
- ✓ Cost savings of 17 aluminium cans (300 ml) in one 5 L canister.

Properties

- ✓ Filling of both product and compressed air in one step.
- ✓ Secured against electrostatic charge.
- ✓ Integrated pressure gauge for visual function control.
- ✓ Replaceable filling coupling.
- ✓ Tool for ventilating the TUNJET S refill can.

Application area

- ✓ System for refilling TUNJET S refill aerosol cans.

Instructions

1. Put the can on the can support and hold.
2. The can fills automatically in approx. seven seconds.
3. Remove the can after audible entry of the compressed air.
4. If the air cushion is too low compared to the amount of liquid, additional compressed air can be applied at the pressure valve.
5. When activating and changing canisters, only air is introduced into the can. The can then needs to be vented.

Notice

- ✓ Only permitted for TUNAP SPORTS drive cleaner or brake cleaner. The manufacturer/distributor accepts no liability for the use of untested liquids. Do not fill with acids or bases!
