

## TUNJET S

### 2016 Filling Station for 915

Eco-friendly filling system for 915 Safety Cleaner with 100% safeguarding against electrostatic charge and toxic fumes.

**Newly developed filling system for more robust design, higher reliability and improved safety.**

- ✓ Newly developed filling system for more robust design, higher reliability and improved safety.

#### Properties

- ✓ Filling of product and compressed air in one operation
- ✓ Special construction 100% safeguarded against static charge
- ✓ Light plastic housing
- ✓ Integrated manometer for visual functional check
- ✓ Large fill capacity (400 ml)
- ✓ Replaceable filling coupling
- ✓ Chemically stable for approved liquids

#### Application area

- ✓ For eco-friendly and cost-effective filling of refillable spray cans

#### Instructions

Place TUNJET can on filling plate and press down. Can fills automatically with product and compressed air in approx. 5-8 seconds. If the compressed air is ever insufficient for completely emptying the can, only compressed air can be refilled on the right filling connection.

#### Notice

- ✓ Air inlet maximum 10 bar
- ✓ Can filled with 8 bar (cleaner)
