

Human Technology[®]

3915 TUNJET Aluminium Can for 915

TUN Solve[®] cleaner technology for maintenance, repair and assembly work. Less harmful to health, as n-hexane-free. Protection of resources through use of renewable raw materials. Removes dust, encrustations, oil, grease, resin and corrosion protection layers. For exclusive use in the TUNJET S system.

Properties

- ✓ Refillable
- ✓ Bottle volumes: 650 ml
- ✓ Fill capacity: 400 ml
- ✓ Large air pressure reserve
- ✓ Compressed air can be refilled separately
- ✓ The special protective cap protects the valve and spray head against damage

Application area

- ✓ Filling with MP 915 cleaner

Instructions

Depressurise the can before filling. To do so, use a suitable tool (e.g. screwdriver) to press the plastic inset on the filling valve inward. Important: Rotate the can and keep the valve away from the body, because residual fluid might escape.
